

## We are - Authorized IRS Electronic Return Originator, ERO

- **Accuracy:** EROs use software certified by the IRS, which helps ensure that your tax return is filed accurately.
- **Speed:** EROs can submit your tax return to the IRS electronically, so you will usually receive your refund more quickly.
- **Convenience:** EROs can help you prepare and file your tax return from the comfort of your own home or office.

**Tax professionals:** CPAs authorized by the IRS to file tax returns electronically on behalf of their clients. EROs must meet specific requirements, such as having a valid Electronic Filing Identification Number (EFIN) and completing annual training on IRS e-file procedures.

**Validation:** Here is our Electronic Return Originator listing on the IRS website:

<https://www.irs.gov/efile-index-taxpros-search?zip=43031&state=All&ero=All&bureau=All&developer=All&transmitter=All>

## We offer 100% Remote Services Worldwide

We only file US taxes, but we can file your returns anywhere in the world with an internet connection. Our secure file-sharing portals allow clients to upload their financial documents to the firm's secure file-sharing system. The firm can then access and review these documents in their offices and load documents that clients can access.

## IDENTITY THEFT FOR EACH PERSON ON THE RETURN, INCLUDING DEPENDENTS

### ID Theft Restoration

- Up to 6 months of daily credit monitoring
- State-specific ID Recovery Kit
- Notification of local authorities and financial institutions
- Fraud alerts on credit records

### Our Secure Portal

Healthcare providers use secure portal technology to protect patients' medical records. We use the exact same technology to secure your financial data. Financial documents are shared with clients without worrying about being intercepted or accessed by unauthorized individuals. **Embrace the future and enjoy the protections this technology provides.**

#### Top-class security:

- **Encryption:** Secure file portals and business emails typically encrypt files and messages at rest and in transit, meaning they are protected even if unauthorized individuals intercept them.
- **Authentication:** Secure file portals and business emails typically require users to authenticate themselves before accessing files or messages. This can be done through passwords, two-factor authentication, or other methods.
- **Authorization:** Secure file portals and business emails allow administrators to control who has access to files and messages. This helps to prevent unauthorized individuals from accessing sensitive information.
- **Auditability:** Secure file portals and business emails typically track who has accessed files and messages, and when they accessed them. This can help to identify and investigate security breaches.
